

ROLLY IV ON SCENE HOSE ROLLER

Your Benefits

- + quick and easy handling
- + easy to transport
- + maintenance-free and robust

Here it is ...

... the on scene hose roller ROLLY IV. Since more than 20 years, firefighters all over the world use and love our hose roller series ROLLY. But many customers asked us for an hose roller with an adjustable hose guide and a hose-removal aid.

... the ROLLY IV ...

The patented ROLLY IV is able to wind layed out fire hoses on the ground easy, fast and in a very comfortable way. Fire hoses up to 75 mm (3") diameter and max. length of 30 m (100 ft) can be winded in dutch style or single folded in approx 10 seconds. The two non-pneumatic tires makes the ROLLY IV completely maintenance-free and always ready to use on the scene.

... with new features.

The magnetically adhering sleeve on the winding fork ensures effortless shedding of firm and center folded hoses. After the hose is winded, the new removing aid can be dropped off with the hose by lateral tilting of the ROLLY IV. The removing aid can be easily taken away from the winded hose and be placed back on the winding bracket.

The foldable support foot guarantees a fast and secure parking of the ROLLY IV at the scene. Due to the magnetic support foot, the ROLLY IV can be used quickly for winding center folded hoses and protect the ROLLY IV from damage. The support food of galvanized steel is held magnetically on the ROLLY IV and can be easily expanded by foot.

Technical Specifications

Product Code	156868
Material	steel
Dimensions	1.400 x 430 mm
Dimensions	750 x 430 x 210 mm (inserted handle)
Weight	11,6 kg

Features

Product Code	Description	Weight
156869	hose-removal aid	0,6 kg
156867	support foot	0,6 kg
